A SOLUTION FOR THE CLASSROOM

Delos' advanced air purification units capture ultrafine particles and can efficiently reduce particles that carry airborne bacteria and viruses. Our solutions feature patented technology capable of trapping and removing particles as small as 0.007 microns at 99.99% efficiency, **which is smaller than the virus causing COVID-19**.

Other key features include:

- 4-stage filtration that efficiently removes particulate matter and harmful gases and odors
- Substantial reduction in airborne microorganisms, chemicals, harmful gases, odors and smoke
- Efficiently remove airborne dust and dander, pollen, mold and fungi
- Prolonged filter life by inhibiting the growth of microorganisms on the filter

Delos advanced air purification units come in three primary sizes and configurations to **accommodate all types of room sizes**, allowing you to find the right solution for a classroom, nurses office, and larger common areas like lobbies and cafeterias. All solutions have **no labor requirements**.
